# Earth Re-imagined

Several artists created images of animals made from Earth's continents and islands. The project was named "*Piece together for peace*". Artists were slicing and moving pieces of the land or whole continents on a map in order to create images of different animals. Below is an "Earth Rabbit", in honor of the current lunar year and our amazing planet.

Can you identify all of the continents and islands?

For other animal images can be found [here](#)
